

**BRADEN-EUROPE B.V.**  
AN INNOVA GLOBAL COMPANY

Braden-Europe B.V. is a global leader in the power generation industry for design, manufacture, installation and retrofit of auxiliary equipment for gas turbines. Braden's products cover the entire auxiliary scope for a gas turbine, from inlet air filter houses, inlet ducts and plenums with acoustic silencers to exhaust plenums or diffusers, outlet ducts, simple cycle stacks, exhaust silencers, or bypass damper and stack systems for combined cycle applications. With hundreds of systems in service for nearly every combustion turbine model, Braden-Europe B.V. has earned an international reputation for unparalleled quality and customer service.

We believe that the power of our success is driven by our talented employees. The long standing Excellence of our Products can only be achieved through the hard work, dedication, and collaborative efforts of our employees.

For our Quality & Service Department we are currently looking for a

## **Field Service Engineer**

### **The job**

- Advising customer or erection contractor regarding proper methods and techniques to ensure that equipment is installed in accordance with company standards and customer specifications.
- Commissioning of our product on site.
- Controlling fabricators to ensure that equipment is fabricated in accordance to the Braden-Europe standards and quality requirements.
- Supervising in-site crews where required, to ensure timely, cost effective installation.
- Trouble-shooting equipment problems and recommending solutions.
- Keeping clear records of drawing deviations and on-site changes and advising home office.

### **Our requirements**

- Technical degree in Mechanical Engineering (MTS or equivalent) or Bachelor Engineering degree. Good knowledge of welding/ construction equipment and techniques (welding qualification and ND Testing knowledge are a plus).
- Minimum of 5 years of experience in a similar position, preferably with air intake systems or exhaust systems.
- Knowledge in hydraulic and/or electrical installation.
- Thorough knowledge of codes and standards applicable to steel fabrication.
- Ability to understand, interpret and communicate engineering drawings.
- Understanding of related manufacturing processes and materials.

- Excellent knowledge of the English and German language (spoken and written) is required. Knowledge of other languages is an advantage.
- Able to work in international assignments around the world and ability to adjust well to changing situations.
- Good communication skills when dealing with subcontractors and clients.
- Customer and service oriented.
- Strong analytical and problem solving skills.
- Team player with a flexible attitude and hands on mentality.
- Willingness to travel frequently internationally.

#### **Our offer**

- A dynamic challenging job with international focus in a pleasant working climate.
- A highly dynamic, international organization with growth ambition.
- Open culture and short communication lines.
- Internal training and support by the company organization.
- Market-oriented salary and benefits.
- Work location will be job sites worldwide.

#### **Interested?**
